MOBYDO

DRMC

Benefits:

- **Workflow control** – *Real time sharing of progress information and material ordering process.*

- **Quality** – *Makes sure your team have instant access to relevant supporting documentation to avoid construction errors, uncertainty and ambiguity.*

- **Responsibility** - *Be involved and updated on critical tasks and responsibilities. Increased focus cost and time.*
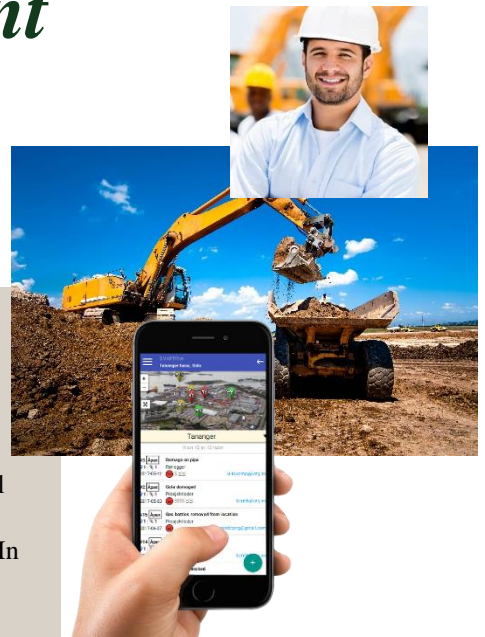

SMART® RISK PROJECT

Digital Project Management

Digital Project Management

Smart Risk Project (SRP) is a risk based project collaboration tool for project teams on remote work sites. Focus on the production work flow, keeping control of tasks, priority, responsibilities, deviations and progress information. SRP is engaging and makes your team updated and involved in the project at all times. In the web based, mobile SRP system you can:

- Easy collect and share technical documentation, priority and progress.

- Locate information, pictures and documents on your own construction drawings or maps.

- Invite users and control individual access levels.

The SRP is offered as a SaaS solution (Software as a Service). Easy to implement, no upfront costs, no local installations. Works on tablets, smartphones and desktop computers. The included deviation system complies with ISO 31000 and are applicable to projects across all industries; design & development, construction, aquaculture, agriculture, Oil & Gas, shipping, manufacturing, asset management, shipping, production, rail & road projects etc.
